

Writing
What the data is telling us.

In both year 3 and year 5, Kinross has more students in the top 20% of achievement and fewer students in the bottom 20% than like schools (see figure 9). There are very few students below minimum standard in both year levels. Comparative results (figure 10) show that KPS results are above state and national levels. Victoria was the state with the highest results for Writing and KPS results are relative in both year 3 and year 5. When comparing Kinross Primary School to the highest performing state, Victoria. Year 3 at Kinross Ps is 9% above Victorian average and year 5 at KPS are 5% above Victorian average. Both year levels achieved above state and national levels.

Distribution of scores in writing (figure 11 & figure 12) show that KPS has more students in the top 20% and fewer in the bottom 20% than like schools.

According to NAPLAN proficiency bands, year 3 (figure 13) and year 5 (figure 14) KPS has more students in bands 6 to 10 than Victoria. This is particularly evident in year 3. In year 5 the results show more students being in the average range (band 6). Very few students are in the lower bands or below minimum standard. Teacher judgements support these results (figure 15 and figure 16) with more of our students achieving A and B grades than those in like schools.

High numbers of students at Kinross Primary School are in the top 20% of ability and there are few students achieving below benchmark. Year 3 distribution bands demonstrate that more students are in bands 6 to 10 than like schools, state and Victoria. Year 5 distribution bands show more students in bands 8 at KPS.
