PLANNING

What aspect of my teaching do I want to do differently?

(provide new ways for me or my students:
to interact and communicate using email;
to present information; to use multimedia to demonstrate their learning;
to use the internet to find information)

How can ICTs help me with this?

(Use a new technology – email; online research; web authoring; scanning; digital video;
digital still camera; multimedia presentation; collaborative project;)

What will I need to learn? About the technology? About learning and teaching?

How will I collect evidence of my learning?

(journal records and reflections, products from my students, video, photos, student reflections etc)

What PD will I need?

ACTION

What am I going to do?

(outline the activities and experiences you and your students will be involved in)

REFLECTION AND RECORDING

*What did you hope to achieve at the beginning of the plan? Was it achieved?
How do you know?*

*What did you learn from your research?
- in terms of your teaching?*

- in terms of students' learning

Did you see any improvement in students in any of the curriculum areas?

Have you shared your findings/experiences with anyone else?

In terms of embedding ICT in your teaching, how do you feel about what you have achieved?

So where to from here? Would you try this again? What do you want to try next?
