MCEETYA Processing Manual	Date: 15/12/2008

1. Introduction

This Processing manual provides an overview of how MAZE can help you in the collection and data entry of student and family background characteristic information as specified in the "Data Implementation Manual for Enrolments for the 2005 and 2006 School Years" document produced by MCEETYA Performance Measurement and Reporting Taskforce. This Data Implementation manual is available on line at <http://www.mceetya.edu.au/public/dm.htm>

The Education Ministers require the data to be collected in order to "enable a nationally comparable reporting of students' outcomes against the National Goals for Schooling in the Twenty-First Century."

The following data needs to be collected for students and parents/guardians:

Data	Student	Parent/Guardian
Sex	Required	-
Indigenous Status	Required	-
Parental school education level	-	Required
Parental non-school education level	-	Required
Parental occupation group	-	Required
Main language other than English	Required	Required
Country of Birth	Required	-

1.1 Overview

This document covers:

- The data collection and data entry of MCEETYA background information for enrolled and future students
- Provides an outline on how the MCEETYA update helps the migration of existing Non-MCEETYA data to MCEETYA compliant data for Gender, Languages and Countries.
- Explains the introduction of numeric keys for MCEETYA standard codes throughout the application
- Provides some handy Sequel (SQL) statements to view MCEETYA background information in Quicklist and Worksheet.
- Explains the Reporting Requirements update to follow

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

2. New Features

2.1 Using New Numeric Keys

Numeric keys have been introduced to make data entry, maintenance and reporting easier for the use of MCEETYA standards. Data can be entered either using numbers or alpha keys.

2.1.1 Selection using Numbers:

In the Indigenous status, country, languages, school education, non-school education and occupation group fields you can enter numbers into the text box. If an exact match is not found, the drop down list will appear showing only items that begin with the numbers entered.

Eg

Entering **4** in a Country of Birth field will result in the list showing all countries that start with '4'

Description	Sacc	Mceetya Compliance
Abu Dhabi	4216	Y
Adana	4215	Y
Aden	4217	Y
Adiyaman	4215	Y
Afyonkarahisar	4215	Y
Agri	4215	Y
Ajman	4216	Y
Alexandria	4102	Y
Algeria	4101	Y
Algerie	4101	Y
Alhucemas	4199	Y
Amasya	4215	Y
Amman	4206	Y
Anatolia	4215	Y
Ankara	4215	Y
Antalya	4215	Y
Arabia	4213	Y
Artvin	4215	Y
As Sudan	4105	Y
As Suriyah	4214	Y
Asia Minor	4215	Y
Assyria	4200	Y
Assyria Iran	4203	Y
Assyria Iraq	4204	Y
Aydin	4215	Y
Bahrain	4201	Y
Bahreïn	4201	Y
Balikesir	4215	Y
Barbary	4100	Y
Basra	4204	Y

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

2.1.2 Selection Using Alpha Data Entry

In the Language and Country fields you can enter the letters into the text box for languages and countries. If an exact match is not found, the drop down list will appear and indicate the first language or country that matches the letters entered.

Eg

Enter **aus** in a Students Country of Birth field takes you to **Austral Island** in the drop down list.

Description	Sacc	Mceetya Compliance
Aruba	8403	Y
Arunachal Pradesh	7103	Y
As Sudan	4105	Y
As Suriyah	4214	Y
Ascension	9222	Y
Ashanti	9115	Y
Asia	0917	Y
Asia Minor	4215	Y
Assam	7103	Y
Assyria	4200	Y
Assyria Iran	4203	Y
Assyria Iraq	4204	Y
At Sea	0001	Y
Atiu Island	1501	Y
Attica	3207	Y
Austral Island	1503	Y
Australia	1101	Y
Australia (includes External Territories)	1100	Y
Australian Antarctic Territory	1603	Y

2.2 Using MCEETYA and ABS Standards for Countries and Languages

The MCEETYA standard specifies the use of the Australian Bureau of Statistics (ABS) standard for Australian Standard Classification of Languages (ASCL) and Standard Australian Classification of Countries (SACC).

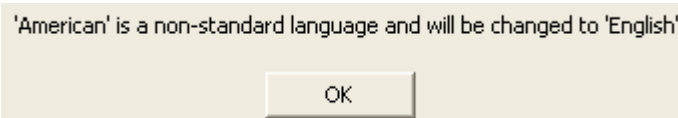

The MCEETYA update uses these standards throughout the database to look up compliant ABS codes for non compliant languages and countries that could be entered. Users therefore do not need to know, or have to manually look up the compliant codes for non standard values. This ensures that your data will become more consistent and complies with nationally specified country and language standards.

This new functionality does not affect Payroll, Creditor and PAYG current functionality.

When the Data Collection forms are returned there is a possibility that the values specified for languages and countries may not be compliant to the MCEETYA standard. These possible values are interpreted by the system and changed to the correct ABS and MCEETYA compliant 4 digit codes.

Eg

Enter **American** into the **LOTE:** field. This will result in the following message being displayed to indicate that American is not an ABS compliant language according to the ASCL standard and will be changed to the correct language of **English** in the database.

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

2.3 Two Different Types of Drop-down Lists

There are two types of drop down lists: Data entry Lists and Reporting Lists. (This does not affect Payroll, Creditor and PAYG current functionality.)

2.3.1 Data entry lists

When entering data for countries and languages you will be presented with a list of ABS compliant countries for selection. This list includes a variety of possible values specified by the ABS which are non-standard countries or languages. After you select a value it is interpreted according to the ABS standard and matched to the approved ABS country and language standard names and 4 digit MCEETYA compliant codes.

Eg

The data entry list for countries contains the values **Malaya, Malacca, Johor, Johore**. All these possible values are non-standard values which are interpreted by the system when selected to the correct standard country code of **5203 Malaysia** which is then stored in the database.

Description	Sacc	Mceetya Compliance
Johor	5203	Y
Johore	5203	Y
Kedah	5203	Y
Kelantan	5203	Y
Kuala Lumpur	5203	Y
Labuan	5203	Y
Malacca	5203	Y
Malaya	5203	Y
Malaysia	5203	Y
Maldives	5203	Y

2.3.2 Reporting lists

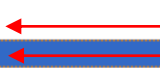

When reporting the drop down list for countries and languages does not contain the all the possible non-standard values, only the MCEETYA compliant codes and the current Non-MCEETYA data.

This allows you to report on MCEETYA compliant and your current Non-MCEETYA compliant data. When your school has migrated all its Non-MCEETYA compliant data and removed the now unused Non-MCEETYA values the list will only contain the MCEETYA compliant codes.

Eg

In the sample below only KGTKEY **5203 Malaysia** appears and not the possible values **of Malaya, Malacca, Johor, Johore**. Additionally, the Non-MCEETYA compliant KGTKEY **Indonesia** (Mceetya Compliance is blank) and the MCEETYA compliant KGTKEY **5202** (Mceetya Compliance is **Y**) are also available to report on.

Kgtkey	Description	Sacc	Mceetya Compliance
5201	Brunei Darussalam	5201	Y
5202	Indonesia	5202	Y
Indonesia	Indonesia	5202	
5203	Malaysia	5203	Y
5204	Philippines	5204	Y
5205	Sri Lanka	5205	Y

 MCEETYA Compliant
 Non-MCEETYA compliant

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

3. Data Collection

To assist in the data collection of currently enrolled and future students, two new formats have been provided:

- Student MCEETYA Data Collection (ST21801)
- Future Student MCEETYA Data Collection (EN21801)

Depending on the State in which your school is located, the most common languages and countries of birth for your region will be printed when these reports are run.

Some of the details printed on these reports will come from the SI (School Information) table. They should have been entered as part of the MCEETYA Installation process.

If the contact details for obtaining assistance in completing this form or the Privacy Policy details are blank, then the format School Campus Information (SI11001) should be used to update the details refer to section **Update Data – SI11001 School Campus Information** in the [MCEETYA VS2a Installation Manual](#).

3.1 Using Student MCEETYA Data Collection (ST21801)

A report has been provided based on the sample data collection form provided by MCEETYA, with the following enhancements:

- Ability to pre-populate the data collection form with a student’s details, including First Name, Last Name, Student Key, School Year, Roll Group and Gender.
- Ability to print the School’s nominated contact person and details for MCEETYA enquiries, a reference to the School’s privacy policy and School logo
- Ability to Print a Blank collection form
- To enable faster and more efficient data entry the numeric MCEETYA codes for background information are printed on the form
- The resulting report will be ordered by School Year, Roll Group and then Student Key in ascending order

1. Select **Students and Families | Student and Family Records | MCEETYA**
2. Run the **Student MCEETYA Data Collection (ST21801)** report
3. Enter input parameters, select OK

Input	Value
From Student	ADAMSK
To Student	ZOSKYJ
From School Year	KG
To School Year	Y12
From Roll Group	08.1
To Roll Group	12.5
Select Campus	1
Print Occupations Group page	Yes
Print Blank Collection Form	No

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

- a. **From Student to Student:** prompts for a range of students
 - b. **From School Year to School Year:** prompt for a range of School Years
 - c. **From Roll Group to Roll Group:** prompt for a range of Roll Groups
 - d. **Select Campus:** prompts for a Campus
 - e. Print Occupations Group Page: prompt to print page 3, **List of Parental Occupation Groups** (for question 6)
 - f. **Print Blank Collection Form:** if user selects **Yes** then the report prints one copy of the Data Collection Form with no student details printed. If you select **Yes** to this option all other options are ignored except the Print Occupations Group page option.
4. For each student in the range the following report will be printed. (See sample below)

VS2a:M VS2a Standard Database

Student MCEETYA Data Collection

3.2 Using Future Student MCEETYA Data Collection (EN21801)

A School can choose to modify the current enrolment forms or use the data collection form provided for future students to gather the MCEETYA background information.

This data collection form report has been provided based on the sample data collection form provided by MCEETYA, with the following enhancements:

- Ability to pre-populate the data collection form with a future student's details, including First Name, Last Name, Student Key, Academic Year, Year of Entry and Gender.
 - Ability to print the School's nominated contact person and details for MCEETYA enquiries, a reference to the School's privacy policy and School logo
 - Ability to Print a Blank collection form
 - To enable faster and more efficient data entry the numeric MCEETYA codes for background information are printed on the form
 - The resulting report will be ordered by Surname and then Student Key in ascending order
1. Select **Students and Families | Future Students | MCEETYA**
 2. Run the **Future Student MCEETYA Data Collection (EN21801)** report
 3. Enter input parameters, select OK

Input	Value
From Student	ALLENP
To Student	WILSONPG
From Academic Year	KG
To Academic Year	Y12
Year of entry	2002
Transfer Status Y/N	N
Select Campus	1
Print Occupations Group page	Yes
Print Blank Collection Form	No

- a. **From Student to Student:** prompts for a range of students
- b. **From Academic Year to Academic Year:** prompt for a range of Academic Years
- c. **From Year of Entry to Year of Entry:** prompt for a range of Years
- d. **Transfer Status Y/N:** prompt for a Transfer Status
- e. **Select Campus:** prompts for a Campus
- f. **Print Occupations Group Page:** prompt to print page 3, **List of Parental Occupation Groups** (for question 6)
- g. **Print Blank Collection Form:** if user selects **Yes** then the report prints one copy of the Data Collection Form with no student details printed. If you select **Yes** to this option all other options are ignored except the Print Occupations Group page option.

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

4. For each future student in the range the report will be printed. (See sample below)

VS2a:M VS2a Standard Database

Future Student MCEETYA Data Collection

Information required for assessment and reporting purposes

Please update any incorrect information

Note: If you need help with this form please telephone Jane Smith on (09) 999 9999

Name of future student:

David	Barrett	BARRETTD
First Name	Last Name	Student Key
Y01	2002	
Academic Year	Year of Entry	

Our Privacy Policy can be found here at <http://www.ourschool.edu.au>

1 Sex Male..... [M]
Female..... [F]

2 Is the student of Aboriginal or Torres Strait Islander origin?

No..... [4]
Yes, Aboriginal..... [1]
Yes, Torres Strait Islander..... [2]
Yes, Both Aboriginal and Torres Strait Islander..... [3]

3 In which country was the student born?

Australia..... [1101]
New Zealand..... [1201]
England..... [2102]
China..... [6101]

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

4. Data Entry

When the data collection forms are returned, data can be entered using the relevant formats for students to enter the student and parental background information.

- Current students: MCEETYA Data Entry (ST11801)
- Future Students: MCEETYA Data Entry (EN11801)

At this point you can choose to update individual students Non-MCEETYA compliant data unless the school has migrated all non-compliant data during the Installation phase.

Your school may have taken one of the following approaches to data migration:

- **Option 1:** Migrate all Non-MCEETYA data during the MCEETYA installation process
- **Option 2:** Migrate only the used Non-MCEETYA data during the MCEETYA installation process
- **Option 3:** Migrate none of the Non-MCEETYA data during the MCEETYA installation process. School has chosen to update on an individual student basis

Depending on which option was selected the data that you can see may include non-MCEETYA compliant data.

If you decide to modify non-MCEETYA compliant data then Maze will only allow new data to be entered that is MCEETYA compliant.

The School can choose at any stage to update non compliant information by following the Section: Migrating Existing Data in the [MCEETYA VS2a Installation Manual](#)

4.1 Using MCEETYA Data Entry (ST11801)

1. Select **Students and Families | Student and Family Records | View and Maintain Student Details** and open Student Information (ST11001) display.

Use the [MCEETYA](#) daisy chain on the "Demographic" tab to open the MCEETYA Data Entry (ST11801) display.

The screenshot shows a web form for student data entry. At the top, there is a 'Student key' dropdown menu with 'ABERNETHM' selected. Below this are several text input fields: 'Surname' (Abernethy), 'First name' (Michael), 'Second name' (Laurence), 'Preferred name' (empty), and 'Email' (m.abernethy@email.com.au). At the bottom of the form, there is a green link labeled 'MCEETYA' which is circled in red.

OR

Select **Students and Families | Student and Family Records | MCEETYA** and open the MCEETYA Data Entry (ST11801) display.

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

2. Locate the Student to update. Every student will have a MCEETYA record.
3. Enter the MCEETYA details from the Data Collection form received from each student. The tab order in the display is the same as the sequence of questions in the data collection form
4. In the Student panel enter:

The MCEETYA Questions 1 to 4 mentioned below refers to the question number printed on the [Data Collection form](#).

- a. **Gender:** can be M or F or NULL (MCEETYA Question 1)
- b. **Indigenous Status:** enter the numeric MCEETYA code or use the drop down to select the correct code from the list. If Non-MCEETYA compliant data is currently stored you can select to change the details now. (MCEETYA Question 2)

If the student has an existing value **Y** or **N** a description of **Yes – Non-MCEETYA** or **No – Non-MCEETYA** will be displayed indicating that the old value is not MCEETYA compliant

- c. **Country of birth:** enter the numeric MCEETYA code or use the drop down to select the correct code from the list. If Non-MCEETYA compliant data is currently stored you can change the details now to. (MCEETYA Question 3)

Eg If the student has an existing country of birth of **Australia** which is a non compliant country key, enter **aus** or **1101**

Current Non-MCEETYA compliant value updated to MCEETYA compliant code

- d. **LOTE:** (Language other than English) enter the numeric MCEETYA code or use the drop down to select the correct code from the list. No current values should be shown as this is a new field. Indicates language OTHER than English spoken at home by the student. (MCEETYA Question 4)

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

5. In the Parental panel enter for Mother/parent1/guardian1 and Father/parent2/guardian2:

Mother/Parent1/Guardian1:	Father/Parent2/Guardian2:
LOTE: <input type="text"/>	LOTE: <input type="text"/>
School Education: <input type="text"/>	School Education: <input type="text"/>
Non-School Education: <input type="text"/>	Non-School Education: <input type="text"/>
Occupation group: <input type="text"/>	Occupation group: <input type="text"/>

The MCEETYA Questions 4 to 6a mentioned below refers to the question number printed on the [Data Collection form](#).

- LOTE:** (Language other than English) enter the numeric MCEETYA code or use the drop down to select the correct code from the list. No current values should be shown as this is a new field. Indicates language OTHER than English spoken at home by the parent. (MCEETYA Question 4)
 - School Education:** enter the numeric MCEETYA code or use the drop down to select the correct code from the list. No current values should be shown as this is a new field. (MCEETYA Question 5a)
 - Non-School Education:** enter the numeric MCEETYA code or use the drop down to select the correct code from the list. No current values should be shown as this is a new field. (MCEETYA Question 5b)
 - Occupation Group:** enter the numeric MCEETYA code or use the drop down to select the correct code from the list. No current values should be shown as this is a new field. (MCEETYA Question 6a - Mother/parent1/guardian1 and MCEETYA Question 6b - Father/parent2/guardian2)
6. Enter the **MCEETYA Date:** which indicates date that the MCEETYA background data was considered updated by School.

MCEETYA Date: 

7. Save record

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

4.2 Using MCEETYA Data Entry (EN11801)

1. Select **Students and Families | Future Students | View and Maintain Future Students** and open **Student – Future Enrolments (EN11001)** display.

Use the [MCEETYA](#) daisy chain on the "Demographic" tab to open the **MCEETYA Data Entry (EN11801) display**.

OR

Select **Students and Families | Future Students | MCEETYA** and open the **MCEETYA Data Entry (EN11801) display**.

2. This format works in the exact same manner as [MCEETYA Data Entry \(ST11801\)](#) as above.

Maze	Version: 1.1
MCEETYA Processing Manual	Date: 15/12/2008

5. Check for Missing or Non-MCEETYA Compliant Data

After data collection forms have been returned and data entered, the report **MCEETYA Data Integrity Check of Students (ST21906)** can be used to check for any students with missing, Non-MCEETYA compliant data or details updated prior to a specified date.

1. Select **Students and Families | Student and Family Records | MCEETYA** and open the MCEETYA Data Integrity Check of Students (ST21906) display.
2. Enter input parameters, select OK

Input	Value
From Student	AARONR
To Student	ZOSKYJ
From School Year	KG
To School Year	Y12
Updated Prior to:	09/03/2005

- a. **From Student to Student:** prompts for a range of students
- b. **From School Year to School Year:** prompts for a range of School Years
- c. **Updated Prior to:** prompt to report records with a MCEETYA Date on or prior to a selected date

If **Updated Prior to:** prompt is left **blank** the report will display ALL students with missing data in the ranges selected

If **Updated Prior to:** date is selected the report will show ALL students with missing data **AND** ALL students who have had MCEETYA data updated prior to the selected date, whether they have missing data or not.

3. For each student in the range the report will be printed. The green dot denotes missing or Non-MCEETYA compliant data. (See sample below)

Maze	Version: 1.1

7. Handy Future Student MCEETYA data SQL

Below is a SQL statement that can be run in Worksheet or Quicklist to show all MCEETYA background data for a range of future Students, Academic Years, Transfer Status for a Year of Entry, which have MCEETYA data updated on or prior to a specified date.

This query can be saved as Stored SQL for easy re-use.

```

select      EN.ENKEY, EN.SURNAME, EN.FIRST_NAME, EN.SECOND_NAME,
            EN.TRANSFER_STATUS, EN.GENDER,
            EN.CAL_YR_ENTRY, EN.AC_YR_ENTRY,
            EN.ABORIGINAL, KIS.DESCRPTION as INDIG_DESC,
            EN.BIRTH_COUNTRY, KGT.DESCRPTION as EN_BIRTH_COUNTRY,
            ENMBD.OLANGUAGE, KGL.DESCRPTION as EN_OTHER_LANG,
            ENMBD.MLANGUAGE, MKGL.DESCRPTION as MLANGUAGE_DESC,
            ENMBD.MSE_STATUS, MKPE.DESCRPTION as MSE_DESC,
            ENMBD.MNSE_STATUS, MKPQ.DESCRPTION as MNSE_DESC,
            ENMBD.MOCC_GROUP, MKPO.SHORT_DESC as MOCC_DESC,
            ENMBD.FLANGUAGE, FKGL.DESCRPTION as FLANGUAGE_DESC,
            ENMBD.FSE_STATUS, FKPE.DESCRPTION as FSE_DESC,
            ENMBD.FNSE_STATUS, FKPQ.DESCRPTION as FNSE_DESC,
            ENMBD.FOCC_GROUP, FKPO.SHORT_DESC as FOCC_DESC,
            EN.MCEETYA_DATE

8. Providing Data to Testing Agents

Currently there are no export facilities available to extract background data for the testing agents.

Currently the MCEETYA standard only specifies data collection requirements. The MCEETYA reporting requirements are yet to be defined. Clients that have purchased the MCEETYA solution will be able to download free of charge these reporting and export enhancements as and when they become available from our [website](#).
